

PICO SURE LASER SKIN REJUVENATION PRE-TREATMENT INSTRUCTIONS

No sun exposure, tanning beds and sunless tanning cream for 4 weeks prior to treatment.

Use a broad spectrum UVA/UVB sunscreen with an SPF of 30 or higher. Apply to the area to be treated every 2 hours when exposed to the sun.

Remove all makeup, creams or oils prior to treatment.

If you would like to use numbing cream, apply 30 minutes prior to your scheduled treatment and wrap with an occlusive dressing (such as saranwrap). This cream may be purchased in our office.
